Key Insights : Banking Performance Analysis

1) France has the highest number of achieve bank members compared to Germany and Spain

There are over 10,000 card holders , showing that credit cards are the bank's most successful product

The average salary of customers is over 100k, which means the bank has a wealthy customer group

Most customers use only 1 or 2 products. Very few people are using 3 or 4 products.

On average , customers stay with the bank for 5 years , showing good long-term loyalty

Only 50% of members are currently active. There is a big chance to re-engage the inactive 5,000 members.

Male customers in France hold the highest account balances , while female engagement in Spanish and Germany is slightly lower
